

# MOVEMENT THERAPY EXPERT

(60-100%)

**Capacity:** At least 60%    **Start Date:** Subject to agreement

## ABOUT US

The Centre for Neurology and Rehabilitation in Vitznau (LU) is a state-of-the-art rehabilitation and research institution dedicated to a unique rehabilitation concept for people suffering from the results of a stroke or other neurological illnesses. Research in the field of clinical neurorehabilitation allows for excellent medical care and optimum therapeutic concepts.

## THE ROLE

In this challenging role you significantly contribute to establishing and further developing our treatment concept. You will be part of an interdisciplinary team consisting of neuropsychologists, speech and movement therapists, focussing on patient-centred, individual and evidence-based therapy. In your role you will define physio- and ergotherapy treatments and serve as a contact person for complex patient cases. At the same time, you actively work with the patients.

## REQUIREMENTS

- + Securing an organised range of therapy offers in the field of movement therapy
- + Clinical supervisions
- + Responsible for weekly patient assessments (incl. selection of assessments and their high-quality implementation in the clinic)
- + Responsible for the professional development of staff as well as training management (internally and externally)
- + You will optimise and actively help shape inter-professional projects
- + Definition and controlling of service quality in the movement therapies area
- + Targeted therapy development and positioning (rehabilitation concept) in collaboration with research, medical, therapeutic and care experts
- + Daily work with patients as part of the inter-professional treatment team (hands-on work)
- + Technical movement therapist recruitment support
- + Organisation and management of technical and case meetings from the movement therapy perspective

## SKILLS

- + Target-oriented personality
- + Exceptionally self-driven regarding concept development
- + Interest in new technologies in the field of rehabilitation to expand the therapeutic concept
- + University degree in sports or movement science or proven professional experience in the fields of ergo- or physiotherapy
- + Exceptional communication skills, high ability to pass on knowledge
- + Interest in working with an inter-professional and international team
- + Sound knowledge of German and English (in speech and writing)

## WHAT WE OFFER

We offer you a position characterised by hands-on work with patients as well as conceptual tasks in a varied work environment. cereneo believes in short decision-making routes which offers you a lot of room for commitment and ideas. We place great importance on quick target implementation.

We are looking forward to receiving your application!
