

The Center for Neurology and Rehabilitation in Vitznau (CH) is a state-of-the-art rehabilitation and research institution dedicated to a unique rehabilitation concept for patients who are recovering from a stroke or suffer from other neurological conditions. Research in the field of clinical neurorehabilitation allows for excellent medical care and optimum therapeutic concepts. Additionally we provide one-on-one support to patients abroad and are looking to strengthen our team there with a

Certified Physiotherapist and/or Certified Ergotherapist (80-100%)

to start immediately or upon arrangement. In this varied role you will mostly support neurological patients from different cultures and countries as part of an inter-professional team. Mostly patients abroad but also in the Switzerland-based clinic, if needed.

Your tasks

- Spending several weeks abroad
- Inter-professional work in different cultural regions
- Independent implementation of individual therapies
- Preparation of individual therapy and training programmes
- Selection and adaptation of appropriate aids
- Administrative documentation tasks

What we expect

- You have completed your training as a Certified Physiotherapist and/or Ergotherapist
- Sound skills and experience in neurorehabilitation and/or respective further education
- You are interested in working with international clients and travelling abroad
- Sound command of English (spoken and written), additional languages are an asset
- You are interested in inter-professional collaboration
- You are open and able to communicate with patients and colleagues
- You work in a structured and independent manner

What we offer

- An international occupation in various locations
- A varied and challenging occupation combining clinical and research tasks
- The possibility of applying research findings in daily clinical work
- The possibility of applying and consolidating state-of-the-art therapy methods (e.g robotics)
