

The Center for Neurology and Rehabilitation in Vitznau (LU) is a state-of-the-art rehabilitation and research facility devoted to a unique concept of rehabilitation of patients after stroke and other neurological disorders. Research in the field of clinical neurorehabilitation provides excellent medical care as well as optimal therapy concepts. For the treatment of our patients, we are looking for a

Speech Therapist 80-100%

In this unique position, you will treat neurological patients in an interdisciplinary team. Evidence-based therapy concepts are essential for your daily work.

Responsibilities

- Clinical diagnostics and treatment of swallowing disorders in patients with acute neurological disorders
- Diagnosis and treatment of systematic speech and voice disorders in acute and chronic neurological patients
- Treatment and care services for international patients at the clinic in Vitznau as well as outpatient services at their home.
- Advice and guidance for relatives
- Interdisciplinary work in the acute and chronic area

Skills

- Well-established completed training as a speech therapist ("Bachelor of Science" degree is mandatory)
- Knowledge of various types of therapy (such as FDT, TAKTKIN, MODAK, PNF, FOTT)
- Knowledge or experience in the diagnosis and treatment of patients with dysphagia
- Research interest as well as a committed and independent working habit
- Independence, resilience and flexibility
- Very Good English skills (oral and written). Good German language skills a big asset.

What we offer

- A unique opportunity to work abroad as a therapist
- Possibility to apply and deepen modern and evidence-based treatment methods
- A motivated and committed international team
